

Scheme A report-level: full-panel predictions | 1/9

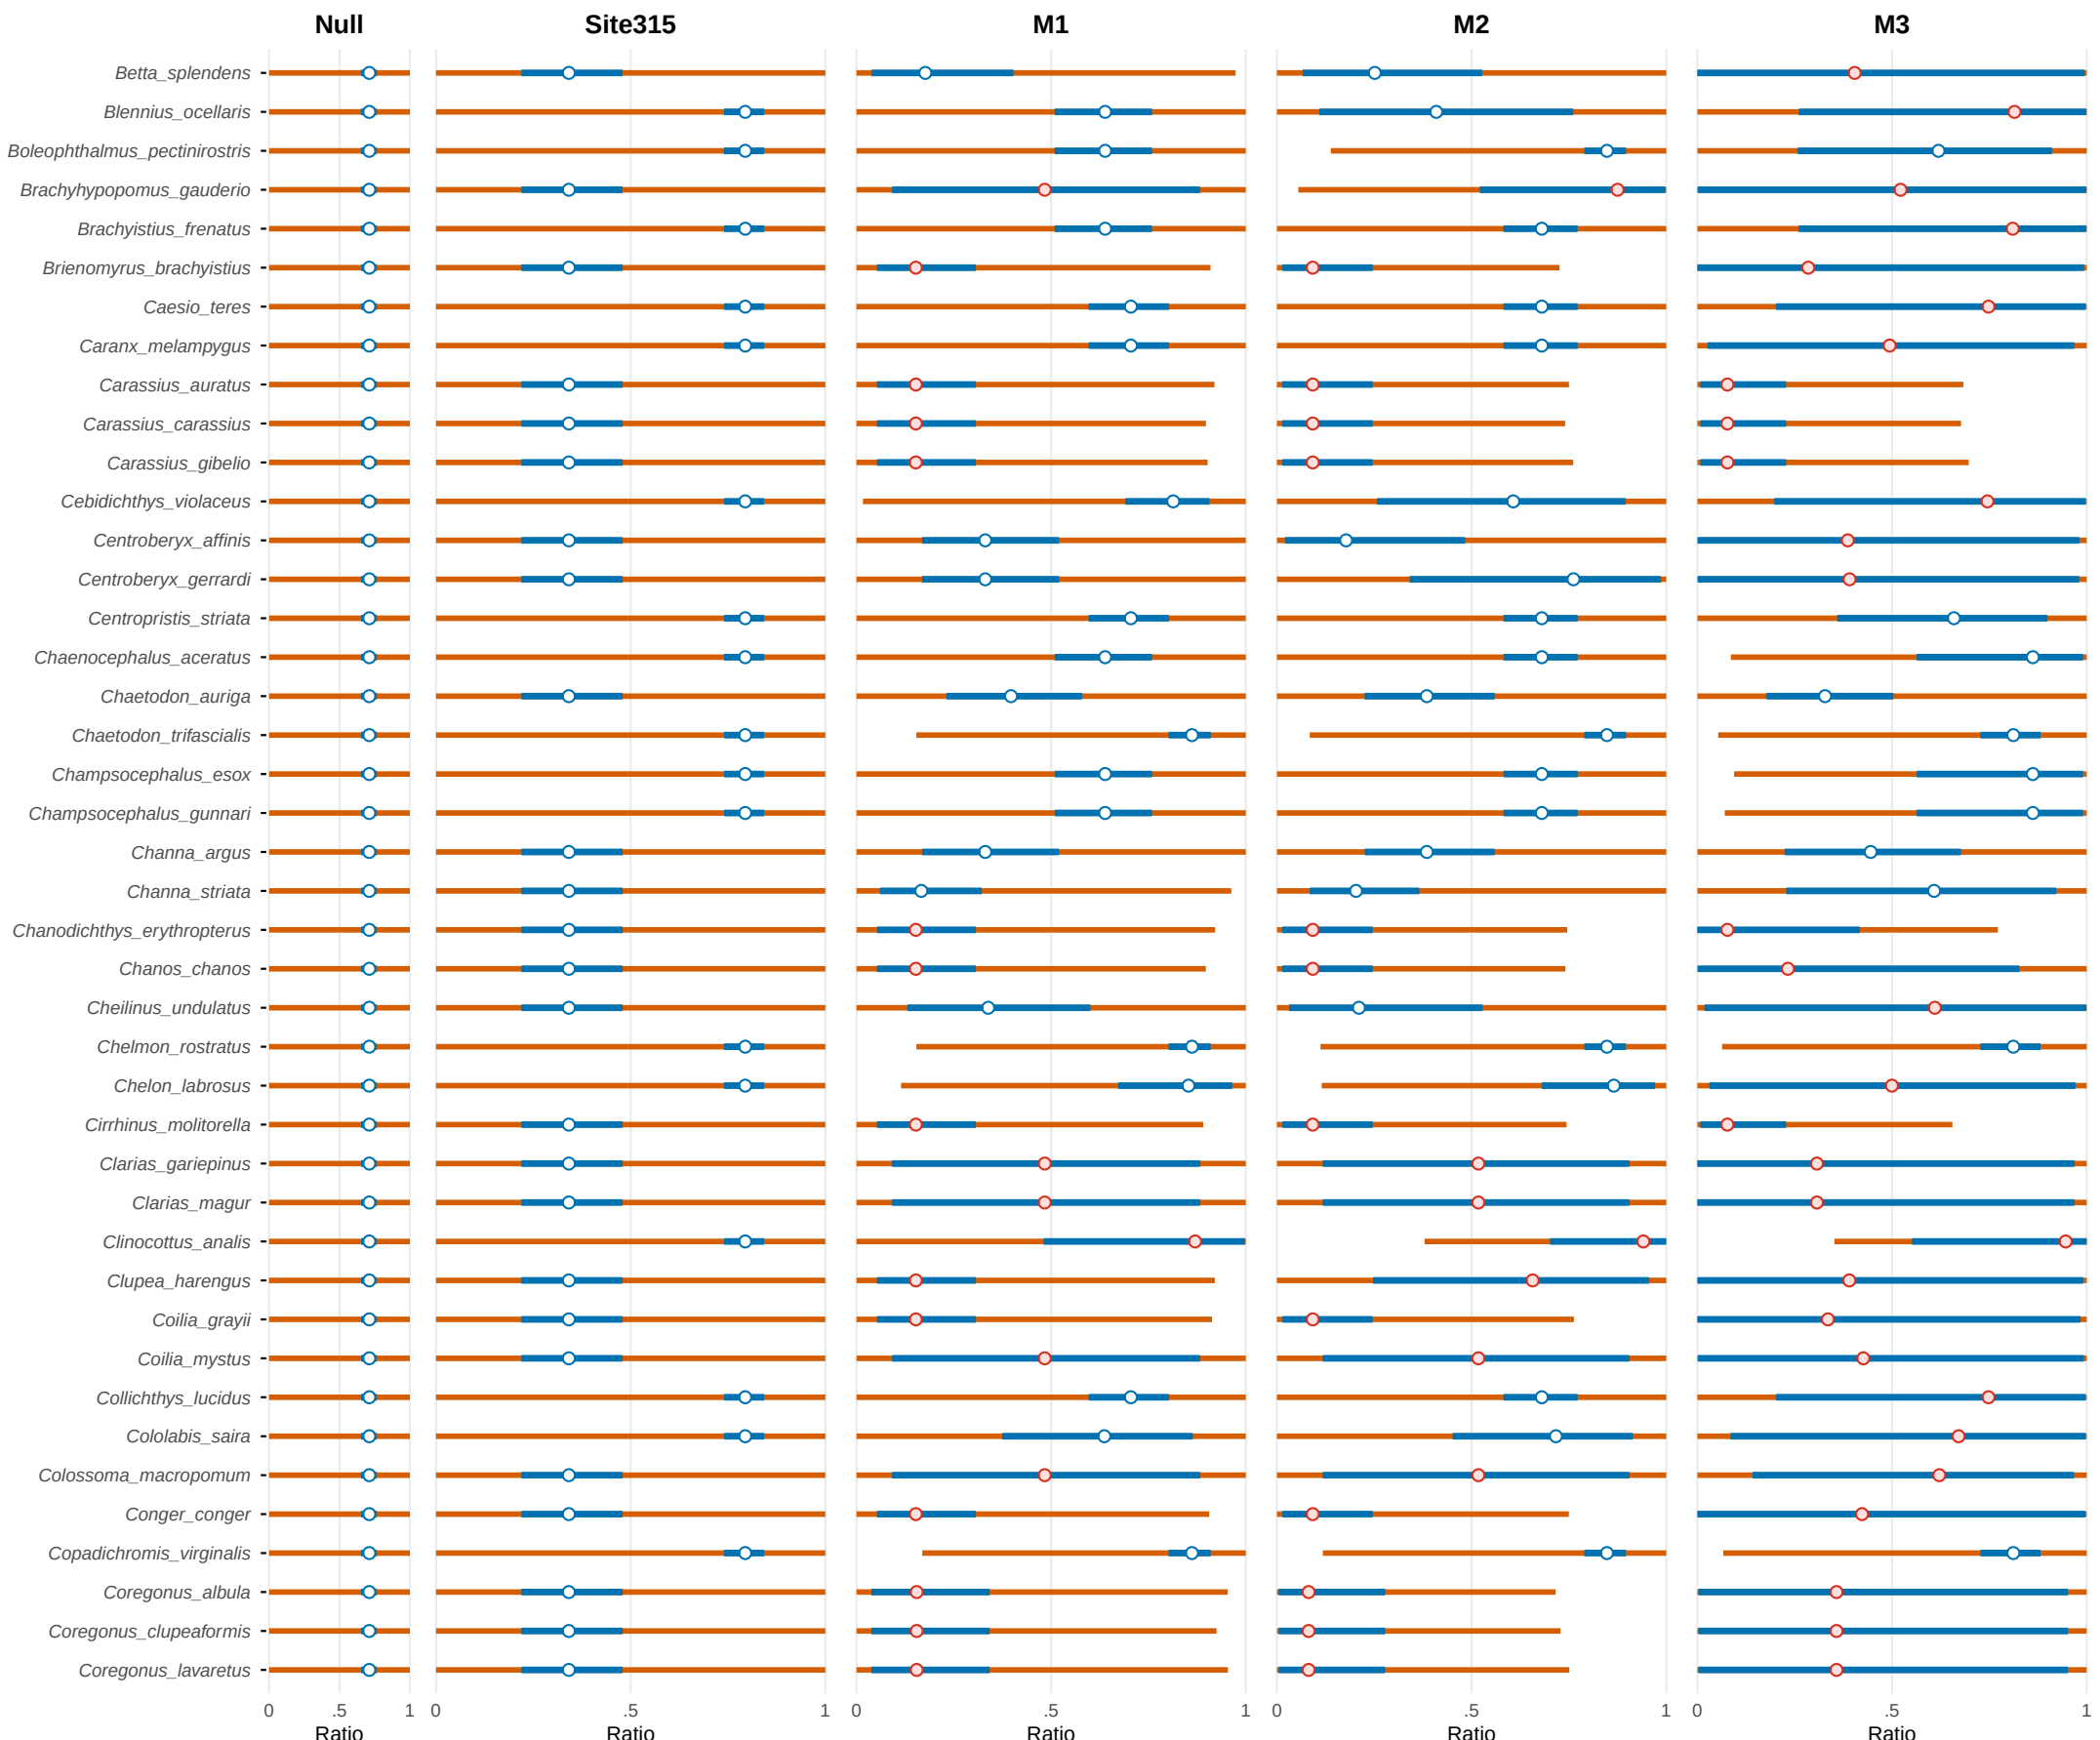

Full-data fit; not held-out validation. The 365 panel predictions are not 365 new experiments.

Point: expected exact-report ratio; blue: 95% posterior CrI; orange: 95% predictive PI. Open/red points mark extrapolation or missing input.

Scheme A report-level: full-panel predictions | 2/9

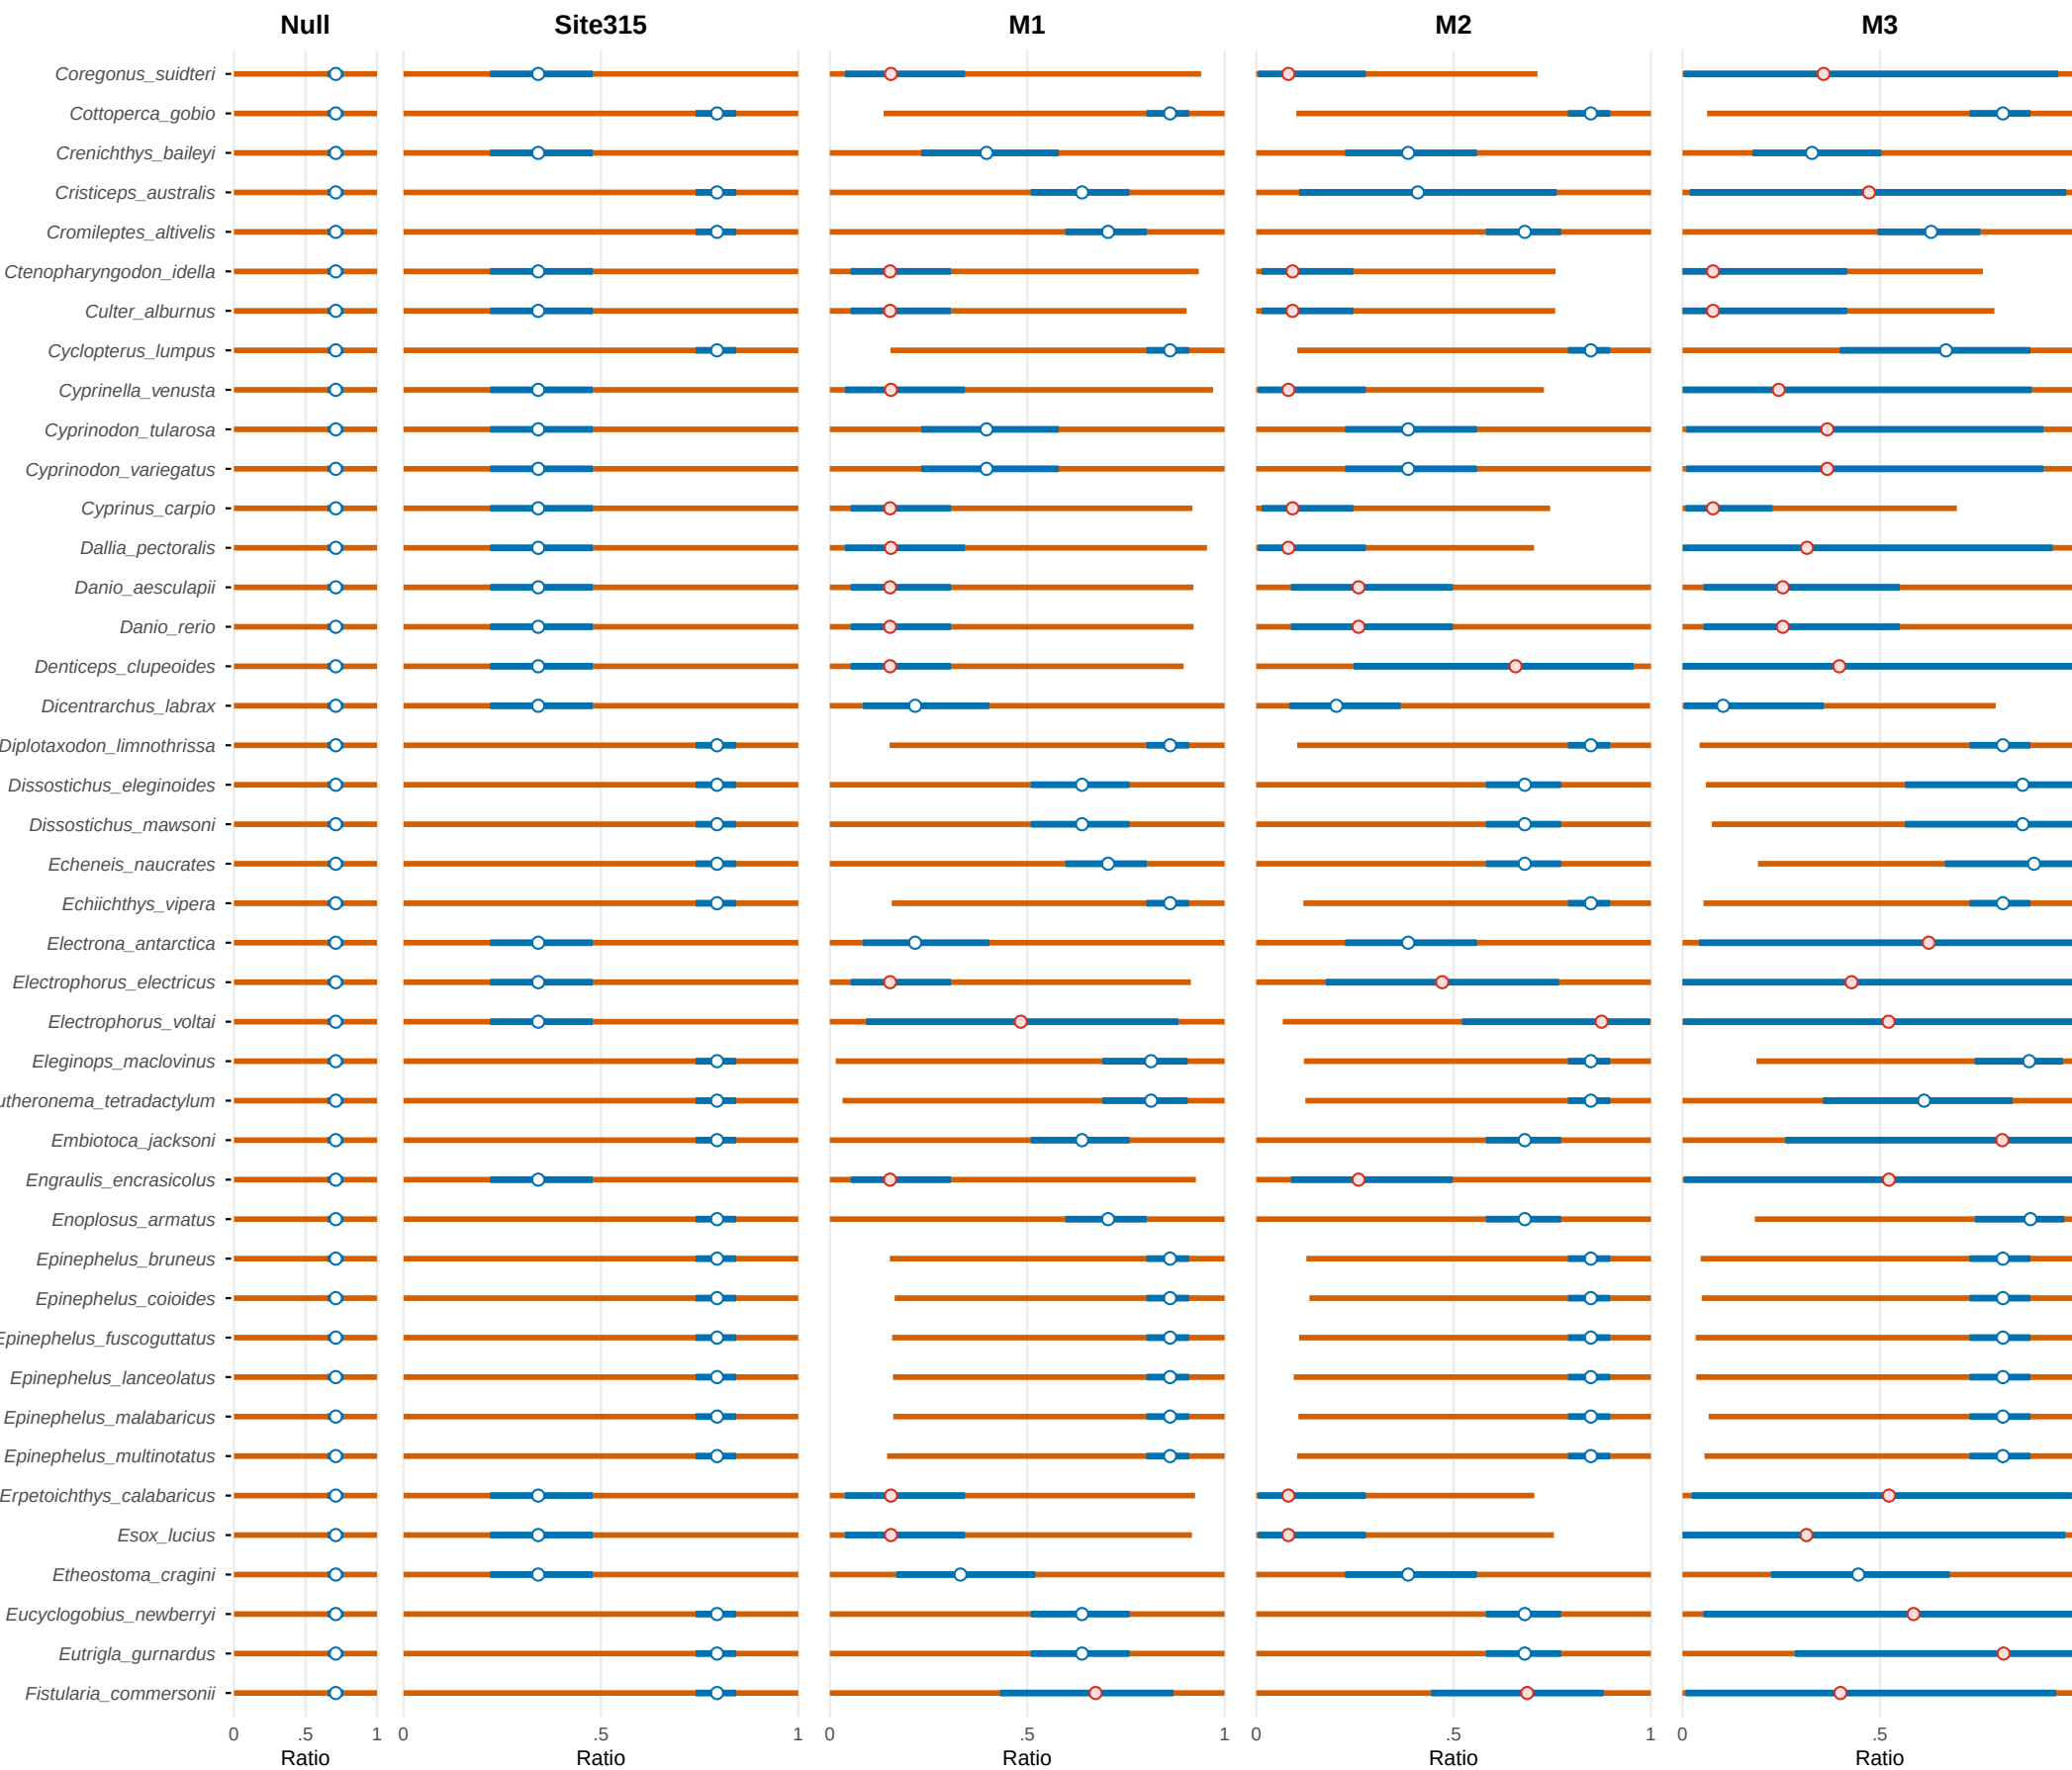

Full-data fit; not held-out validation. The 365 panel predictions are not 365 new experiments.

Point: expected exact-report ratio; blue: 95% posterior CrI; orange: 95% predictive PI. Open/red points mark extrapolation or missing input.

Scheme A report-level: full-panel predictions | 3/9

Full-data fit; not held-out validation. The 365 panel predictions are not 365 new experiments.

Point: expected exact-report ratio; blue: 95% posterior CrI; orange: 95% predictive PI. Open/red points mark extrapolation or missing input.

Scheme A report-level: full-panel predictions | 4/9

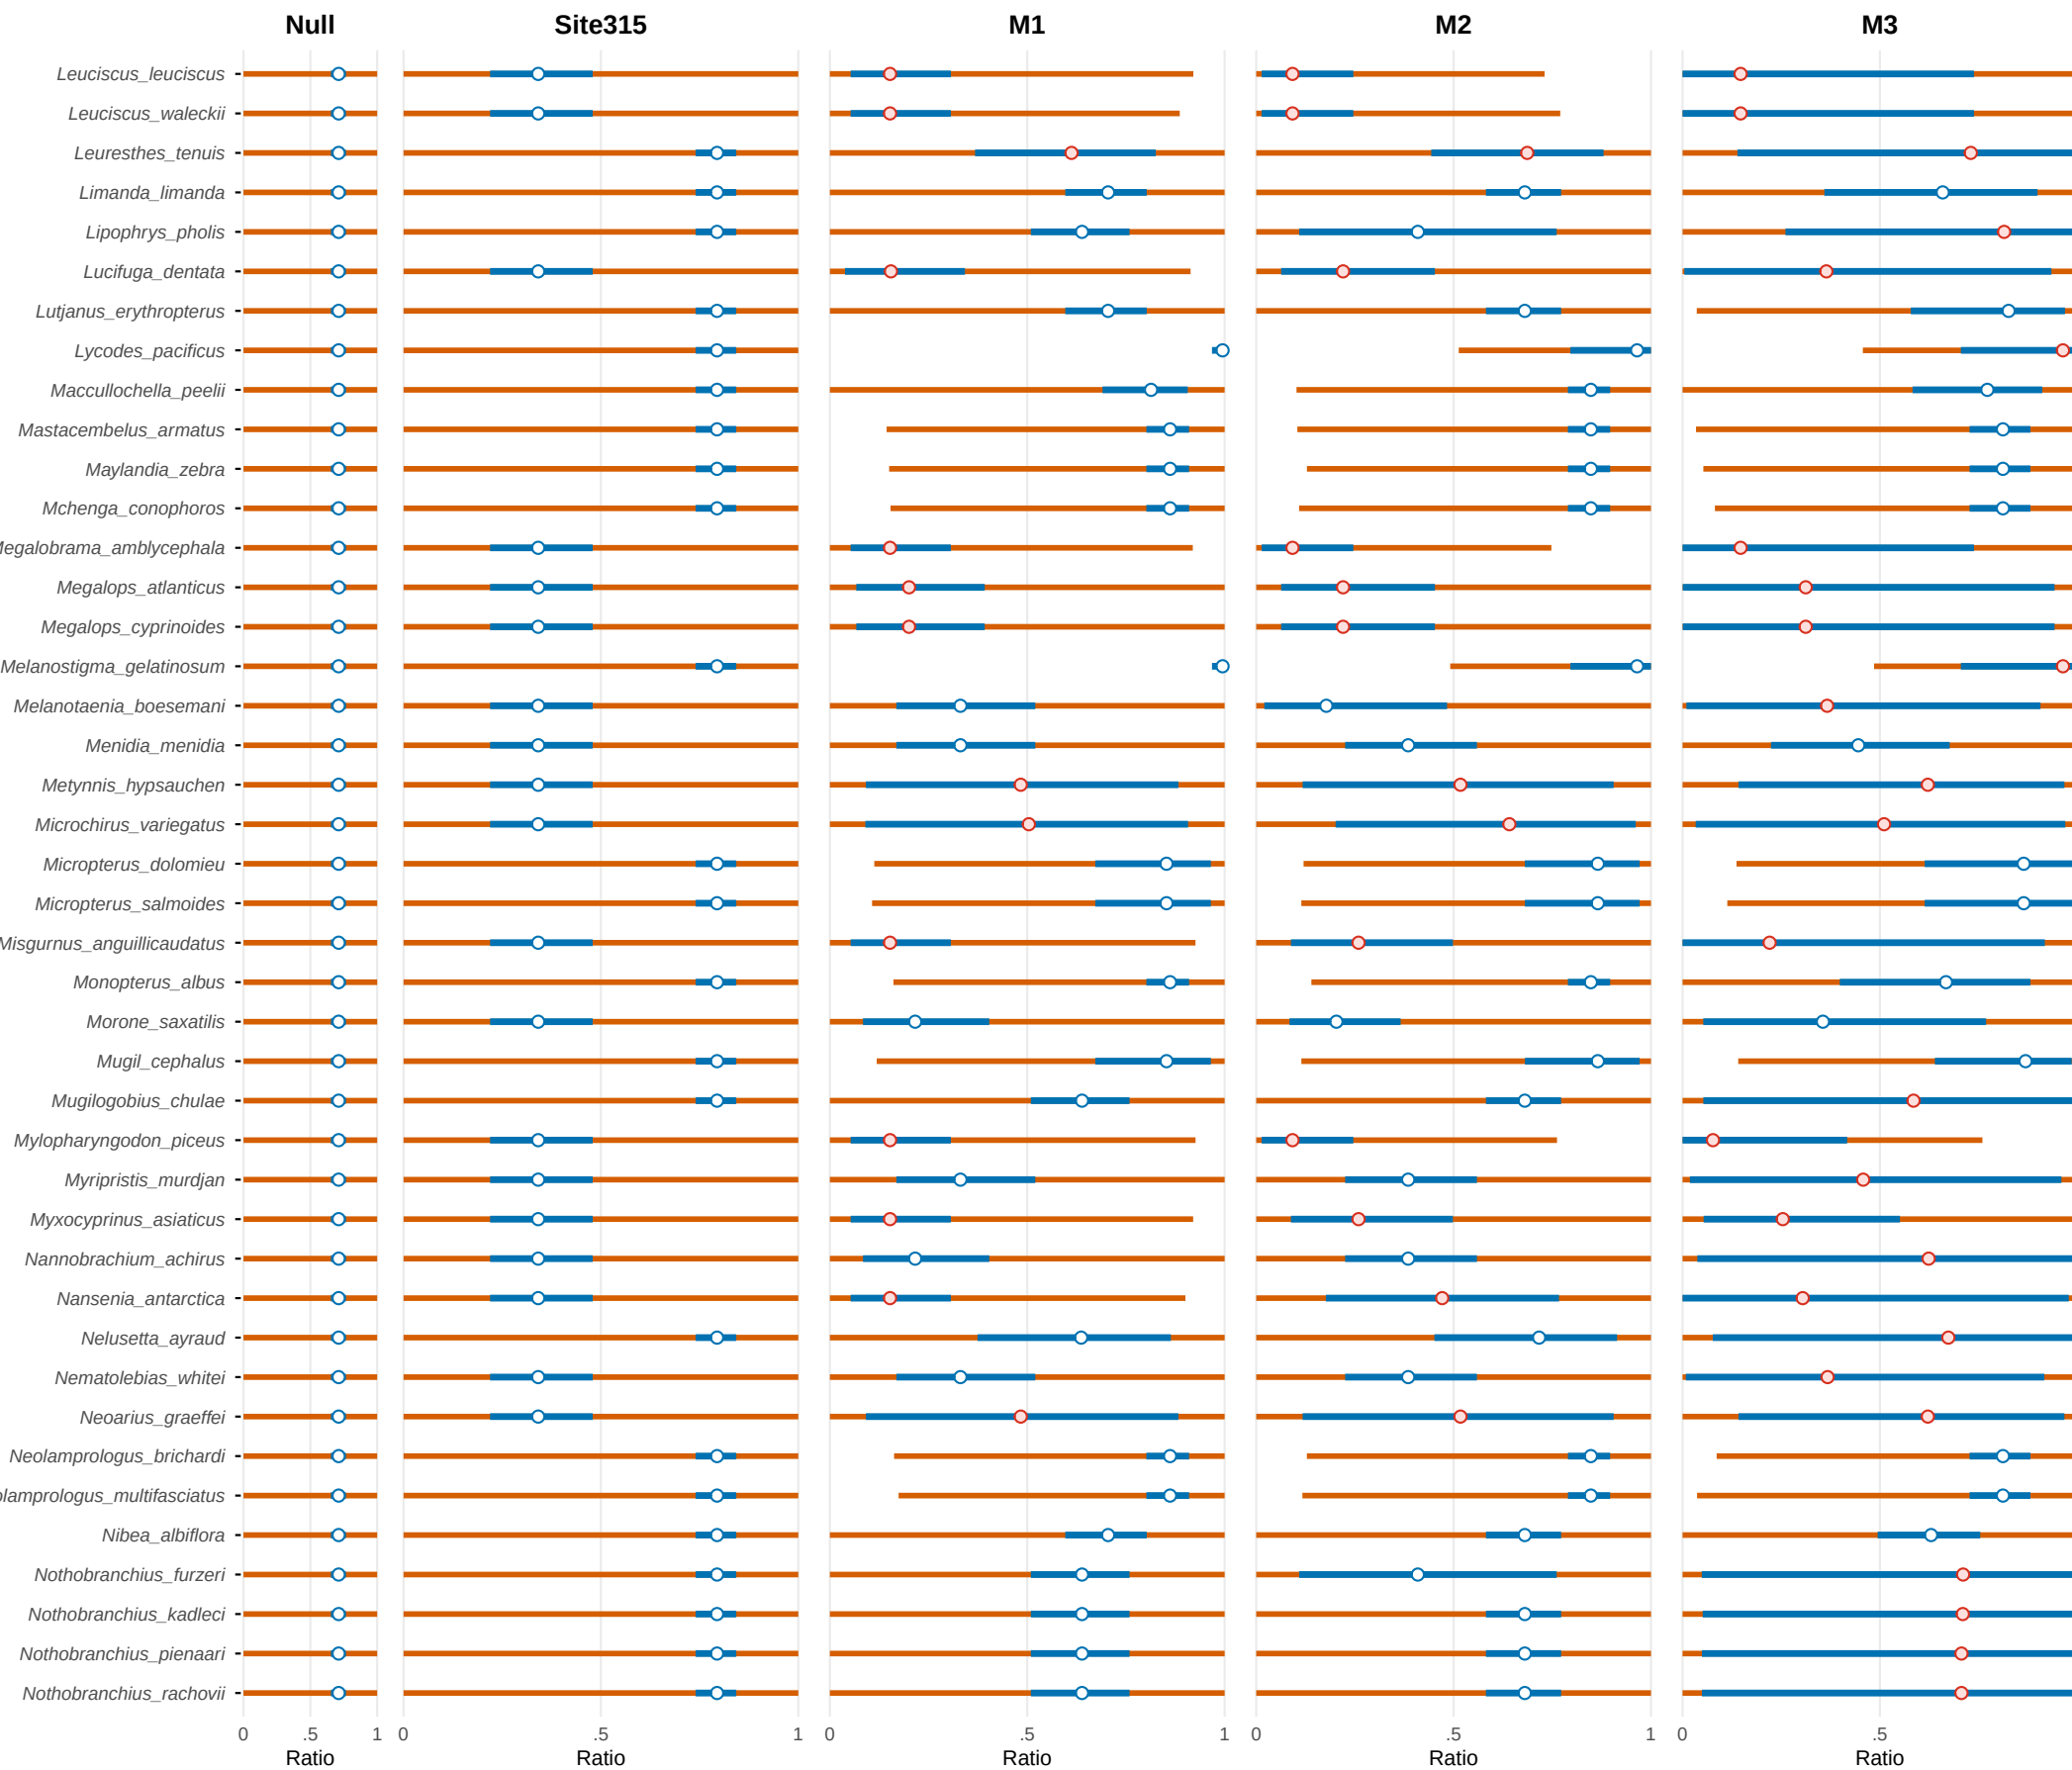

Full-data fit; not held-out validation. The 365 panel predictions are not 365 new experiments.

Point: expected exact-report ratio; blue: 95% posterior CrI; orange: 95% predictive PI. Open/red points mark extrapolation or missing input.

Scheme A report-level: full-panel predictions | 5/9

Full-data fit; not held-out validation. The 365 panel predictions are not 365 new experiments.

Scheme A report-level: full-panel predictions | 6/9

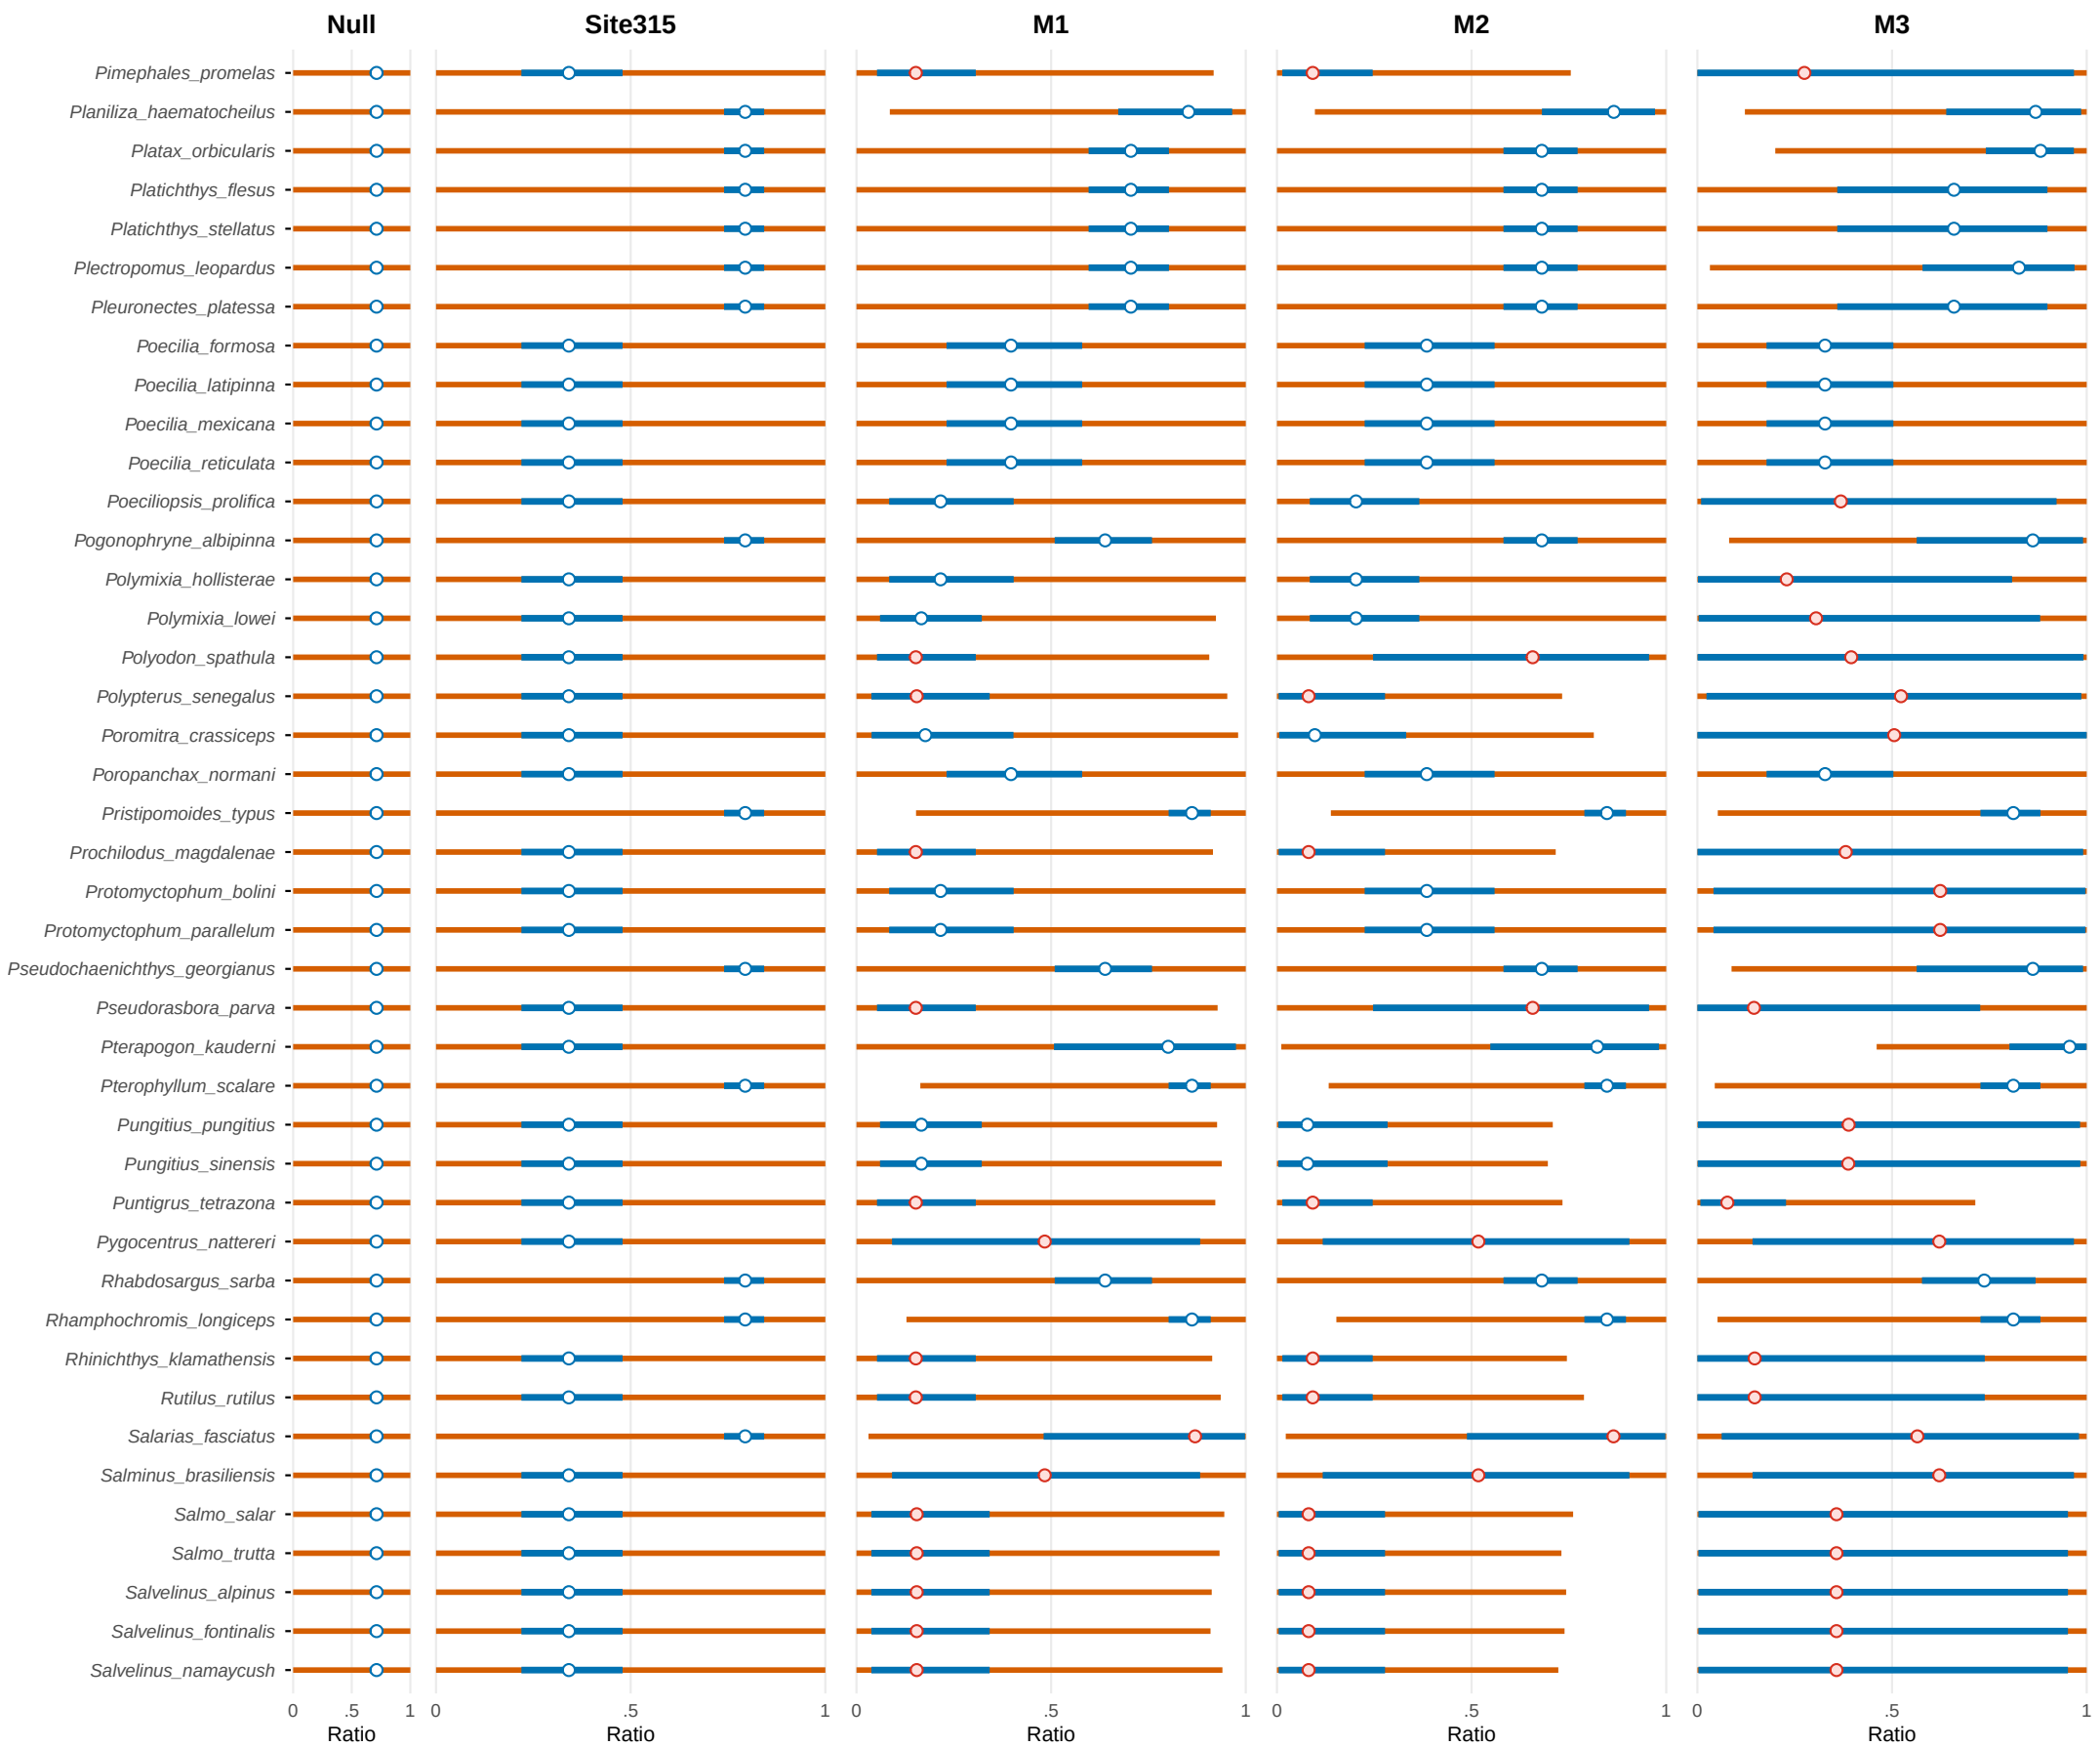

Full-data fit; not held-out validation. The 365 panel predictions are not 365 new experiments.

Point: expected exact-report ratio; blue: 95% posterior CrI; orange: 95% predictive PI. Open/red points mark extrapolation or missing input.

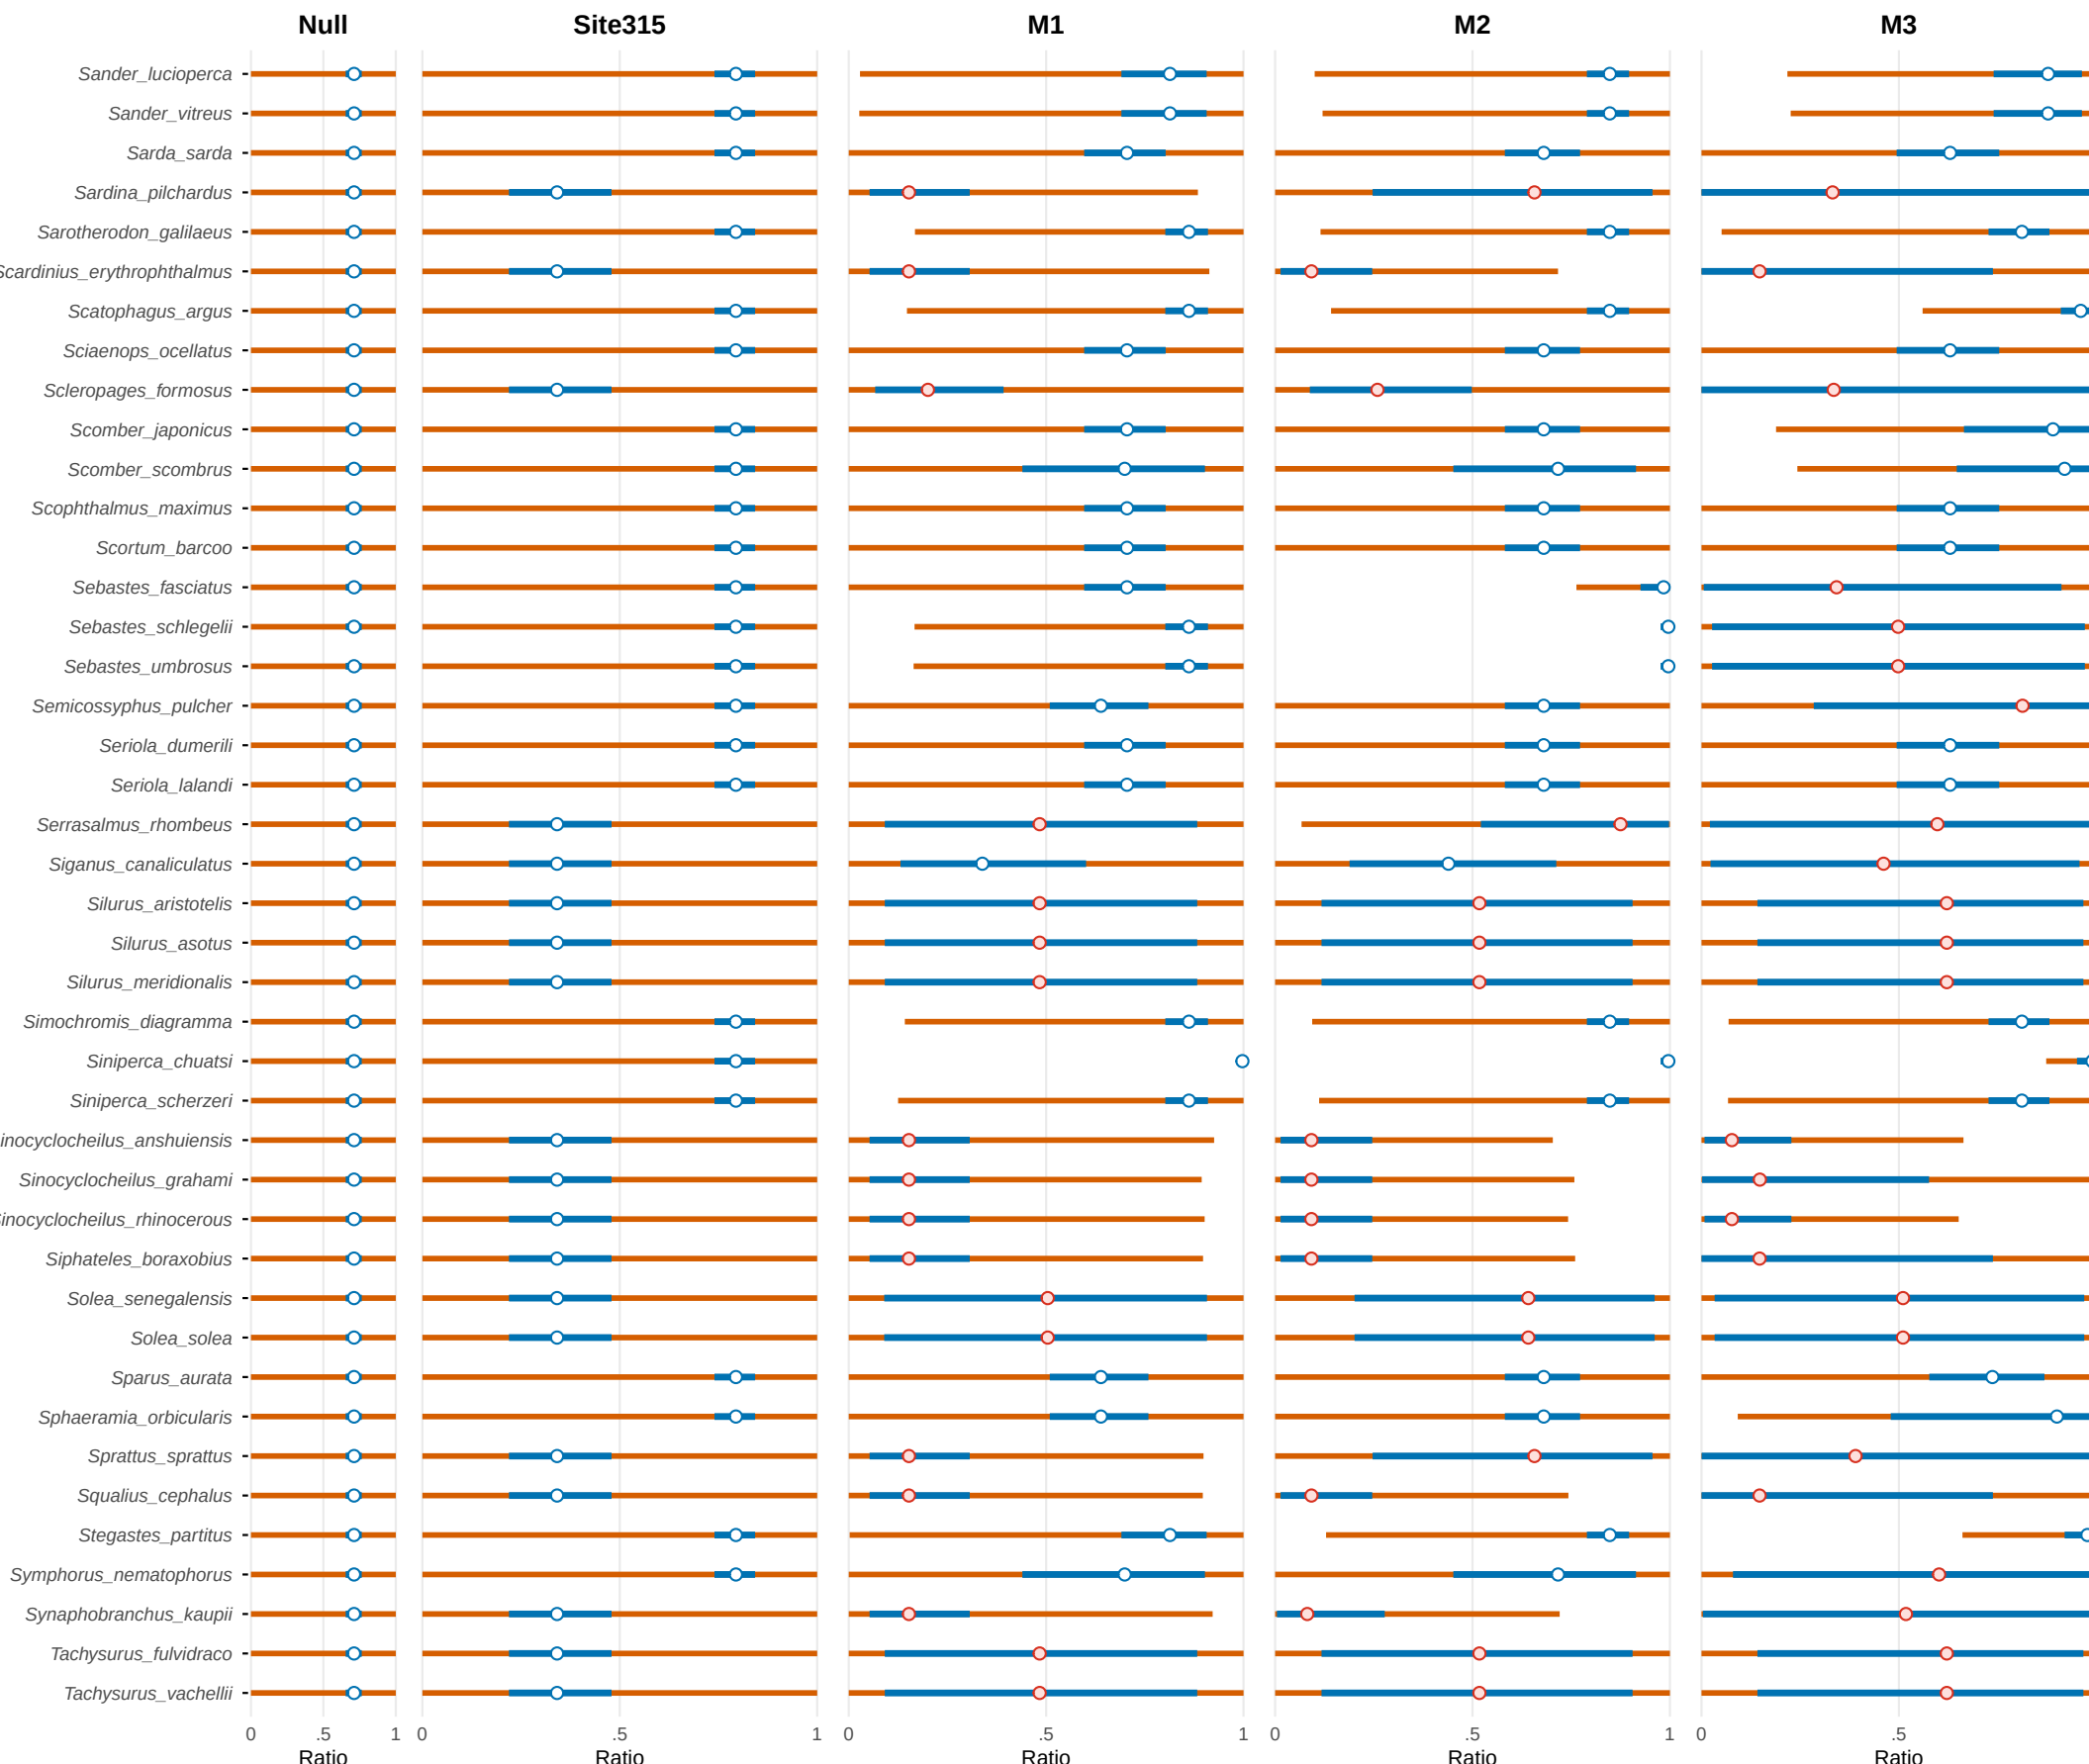

Scheme A report-level: full-panel predictions | 7/9

Full-data fit; not held-out validation. The 365 panel predictions are not 365 new experiments.

Scheme A report-level: full-panel predictions | 8/9

Full-data fit; not held-out validation. The 365 panel predictions are not 365 new experiments.

Point: expected exact-report ratio; blue: 95% posterior CrI; orange: 95% predictive PI. Open/red points mark extrapolation or missing input.

Scheme A report-level: full-panel predictions | 9/9

Full-data fit; not held-out validation. The 365 panel predictions are not 365 new experiments.

Point: expected exact-report ratio; blue: 95% posterior CrI; orange: 95% predictive PI. Open/red points mark extrapolation or missing input.
